

VENDING MACHINE APP

HOME

The first screen that the user will see when opening the app or approaching the vending machine is a display that shows all available options. Each item is categorized respectively to its shelf by using A1..C5. The user only needs to select an item they want and insert the amount required to purchase the product.

Admin

The admin or BOSS button is located at the top right hand of the GUI. The manager of the vending machine can select that when maintaining the machine.

The admin screen contains four items "Product Price", "Remove Product", "Restock", and "Inventory".

HOME BACK

ENTER NEW PRICE

\$

UPDATE

Product Price

The Admin can adjust the price to the products by typing in the new amount and then pressing update. The new price will change the cost for all products since this machine only has one cost for all items.

HOME BACK

REMOVE PRODUCT

Type the inventory number of the product you would like to remove.

Type the amount of product you would like to remove in integer form.

UPDATE

Remove Product

The admin can remove product by typing in the ID number for the item and then the amount of product he/ she would like to remove.

[HOME](#)[BACK](#)

RESTOCK PRODUCT

Type the inventory number of the product you would like to restock.

Type the amount of product you would like to restock in integer form.

[UPDATE](#)

Restock Product

Restocking works similar to Removing product. The admin enters the ID number of the desired product he/ she would like to restock and the amount and then presses update.

|  2 C1 |  8 C2 |  4 C3 |  5 C4 |  10 C5 |

Inventory

The inventory page shows a standing list of all the products and their current stock. There is nothing special that can be clicked here. This is an info only page.
